## *Something to Think About . . .*

ROOT SYSTEM: The Root System we have developed enabled our seedlings to weather the extremely dry season without watering. This factor has hardened these seedlings for conditions in the field.

## *Important Notice . . .*

Complete list of available stock on back of this page. Let us quote you on your Spring order now.

We shall display as much of this stock as possible at the Pennsylvania Farm Show, Space No. 564, Section E.

## *Planting Machine . . .*

We have secured the agency for a leading mechanical planter with which in planting 300,000 seedlings this past Spring we averaged 10,000 per day under all types of conditions. Write us for complete information and prices.
